ALEX MORGAN

Software Developer & Automation Engineer

San Francisco, CA | alex.morgan.eng@example.com | +1 (415) 890-3412 | github.com/alexmorgan-dev

PROFESSIONAL SUMMARY

Software Developer and Automation Engineer with 6+ years of experience specializing in resilient full-stack systems, automated CI/CD testing pipelines, and cloud-native infrastructure. Proven track record reducing deployment failures by 85%, cutting regression testing cycles from hours to minutes, and scaling web services to handle 15M+ daily transactions.

CORE TECHNICAL COMPETENCIES

- Languages & Frameworks: TypeScript, JavaScript, Go, Python, React, Next.js 14, Node.js, Express, FastAPI, HTML5, Tailwind CSS
- Automation & Testing: Playwright, Cypress, Vitest, Jest, k6 Load Profiling, Contract Testing, Selenium, CI/CD Flakiness Elimination
- Cloud & DevOps: Docker, Kubernetes, AWS (ECS, Lambda, S3, RDS), Terraform, Helm, GitHub Actions, Prometheus, Grafana
- Databases & Queues: PostgreSQL, Redis, Kafka, MongoDB, ClickHouse, Prisma ORM

PROFESSIONAL EXPERIENCE

Lead Automation & DevOps Engineer

2022 – Present

CloudScale Technologies — San Francisco, CA

- Architected automated CI/CD pipelines reducing deployment failure rate by 85% and cutting regression testing time from 3.5 hrs to 28 mins.
- Engineered an automated ephemeral preview environment system on Kubernetes for every pull request, accelerating QA sign-off by 4x.
- Mentored 14 software engineers in automated testing best practices, test-driven development (TDD), and zero-downtime deployment strategies.
- Introduced automated performance regression guards with k6 into staging environments, catching 22 latency regressions prior to production.

Senior Full-Stack & Automation Engineer

2020 – 2021

FinStream Systems — San Francisco, CA

- Built resilient microservices handling $40M+ in daily transaction volume with 99.99% availability.
- Established comprehensive automated contract and API test suites, reducing external API integration regressions by 90%.
- Created an internal developer CLI tool in TypeScript that automated local dev environment spin-up from 45 mins to 2 mins.

Software Developer (Platform & Automation)

2018 – 2020

DataPulse Inc. — San Jose, CA

- Redesigned the automated testing pipeline using Jest and Cypress, doubling test coverage from 44% to 92%.
- Spearheaded migration of on-premises Jenkins build servers to cloud-native GitHub Actions, saving $38,000 annually in hosting costs.

EDUCATION & CERTIFICATIONS

University of California, Berkeley — B.S. in Computer Science (Dean's Honor List, Cum Laude)

Certifications: AWS Solutions Architect Associate (2023) | Certified Kubernetes App Developer (CKAD, 2023) | Terraform Associate
